Introduction

A Comprehensive Assessment System (K-2)

A comprehensive assessment system is integral to teaching and learning. Educators should incorporate a variety of assessments with different purposes at different intervals depending on the level of content assessed (i.e., course-level, unit-level, and lesson-level) throughout the school year. These include diagnostic assessments, formative assessments (both formal and informal), and summative assessments. These multiple assessments combine to form a more complete picture of students' learning, focusing on students' growth as they aim to master grade-level standards.

Educators should become adept at using assessment to drive decision-making. Used well, the combined data from assessments can encourage students (and educators), monitor and communicate student progress toward standards-aligned learning targets, and can help students and educators take effective action to better learning outcomes. In a comprehensive assessment system, both educators and students have a hand in using the data gleaned from assessments to monitor growth and make decisions.

Understanding the Just Right Reader Assessment & Progress Monitoring Guide

The aim of this guide is to ensure educators understand how to prepare for, administer, and use data collected from Just Right Reader's assessments to maximize student growth. This guide will help you understand

- the importance of a comprehensive assessment program and the purpose(s) of each type of assessment: diagnostic, formative, and summative;
- the standards and skills assessed within each assessment, organized by grade-level;
- a recommended timeline or schedule for administering assessments at each grade level;
- how best to administer and score assessments to ensure consistency across administrations, thus increasing the validity and reliability of the assessment data;
- how to effectively organize and use the data to monitor individual student and whole class progress and make data-driven instructional decisions to result in growth and achievement;
- why and how to involve students in monitoring their progress toward standards-aligned goals and reflecting upon their learning behaviors and outcomes; and
- how best to communicate the data with other stakeholders.

Figure 1. Types & Purpose(s) of Assessment

	Diagnostic	Formative	Summative
Definition	Diagnostic assessment gauges students' knowledge and skills before learning and teaching happens.	Formative assessment gauges students' knowledge and skills during learning and teaching. These can be formal or informal formative assessments.	Summative assessment gauges students' knowledge and skills after learning and teaching have taken place.
Purpose	<p>A diagnostic assessment is used to "diagnose" knowledge, skills, and abilities— areas of weakness and strength or standards/skills that a student has learned already and which they need to be taught.</p> <p>Teachers use the diagnostic results to guide them as they decide next instructional steps to support/intervene or to enrich students' learning during whole-class, small-group, and/or individual instruction.</p>	<p>Formative assessments identify students' learning strengths and areas of need so teachers can adjust their instruction to provide targeted, differentiated support and enrichment. Formative assessment demands that teachers act—using the data to inform what and how they teach students.</p> <p>Informal formative assessments assess in-the-moment and are often embedded within day-to-day activities. Feedback is specific, and teacher action is immediate.</p> <p>Sometimes formative assessments are more formal, such as the progress monitoring Mastery Measures. These Mastery Measures evaluate student performance one skill at a time to ensure mastery before moving to the next skill.</p>	<p>The intent of summative assessments is to measure and report mastery—it's a "summation" of learning.</p> <p>(While not necessary by definition, teachers can use this summative data to identify skills that need to be retaught or reinforced and to monitor students' progress toward standard mastery.)</p>

Kindergarten Assessments

Overview

Texas educators should ensure use of a comprehensive assessment program, incorporating a variety of diagnostic, formative, and summative assessments to assess the foundational literacy skills outlined in the Texas Essential Knowledge & Skills (TEKS). Teachers should collect assessment data before, during, and after learning. They must also choose the appropriate combinations of assessments based on educational purpose and understand how to collect the data so it is reliable and valid, how to organize the data so it is easy to read and analyze, and how to best use and communicate the data to ensure students develop and sustain foundational literacy skills.

Figure K.2 provides an overview of the TEKS foundational literacy standards and learning objectives Kindergarten students must master to be skilled readers. Moreover, the table provides a map of the varied assessments within the Just Right Reader Assessment Program, categorizing each assessment by purpose as well as aligning the assessments with grade-level TEKS standards.

The Spanish Kindergarten Assessment Timetable (Figure K.3) follows the systematic Just Right Reader Spanish Progression. It includes direction regarding whether all students or a subgroup of students should be assessed and recommendations for frequency and timing of assessment administration dependent on assessment purpose. How to prepare for, administer, and score the assessment as well as reminders or tips related to data collection are within the directions for each assessment within the Just Right Reader Assessment Program.

While some assessments are Kindergarten-specific, assessing only those skills included in Kindergarten TEKS standards, other assessments include skills from the First and/or Second Grade TEKS standards, and are labeled with a K-2 designation. The reason is based on assessment purposes. For example, a diagnostic assessment is meant to “diagnose” what students have already learned prior to instruction, and some students may have already learned skills designated in other grade levels. Including the option to show what they know related to these standards and skills will provide teachers with data to provide enrichment for these students so they too demonstrate growth. A second example is the progress monitoring assessment, Mastery Measures. These assessments are designated K-2 because a 1st grader, for example, could be working toward mastery of a Kindergarten-level skill. Educators can use the progress monitoring measures to best fit students’ needs based on other assessment data collected.

Summative	Spelling Tests [See Spelling (KG) Lesson.]	Lesson/Unit	All	Weekly to Bi-Weekly	throughout Sets 1-10

Diagnostic Assessments

Just Right Reader has included a Kindergarten grade-level diagnostic. This formal, standardized diagnostic assessment measures curriculum-based alphabetic principle and phonics skills learned over the school year and provides a baseline of performance. As indicated in Figure 1, this diagnostic assessment should be administered before instruction of the assessed skills begins and can assist educators in organizing students for small group instruction (TEA, 2023). Detailed guidance regarding who should be assessed using the Diagnostic Assessment, which section(s) to administer, when to administer the assessment, and how to administer this assessment is included in part in Figure K.3: Spanish Kindergarten Assessment Timetable and in total within the Spanish Diagnostic Assessment (Phonics) Administration Guide (Appendix A).

Formative Assessments

Formative assessments occur during learning. “In-the-moment” or “on-the-fly” informal assessments occur during a lesson or activity (NCTE, p. 3). Others are more formal and are decided before instruction or are embedded in the curriculum and used to gather data at significant points during the learning process (NCTE, p. 3). All seek to understand students’ current levels of performance and to use teacher’s knowledge and expertise regarding the curriculum and pedagogy to refine practice and improve student learning (NCTE, p. 2).

Educators utilize assessment tools, such as checklists, rubrics, and observation forms, to frequently assess students’ progress toward and mastery of phonological awareness, the alphabetic principle, phonics (decoding and encoding, including high frequency words), and fluency skills during day-to-day, lesson-embedded activities. Several varied, in-the-moment formative assessment tool templates, including digital, editable copies, are provided within the Just Right Reader Assessment Program. In addition, Just Right Reader’s supplemental Progress Monitoring Guide includes step-by-step guidance to monitor progress using planned, formative assessment with a combination of data tools.

Mastery Measures (skill-based probes) are more formal progress monitoring assessments included in the Just Right Reader Assessment Program. These Mastery Measures evaluate student performance one skill at a time to ensure mastery before moving to the next skill (IRIS Center, 2024). Detailed guidance regarding who should be assessed using Mastery Measures, which measure(s) to administer, when to administer the probe(s), and how to administer these progress monitoring assessments is included in part in Figure K.3: Spanish Kindergarten Assessment Timetable and in total within the *Spanish Mastery Measure Administration Guide* (Appendix B).

Summative Assessments

Just Right Reader’s Kindergarten Assessments include summative assessments (see Figure K.2 and Appendix C). These standards-aligned assessments are a summation of learning and are administered at the end of each unit or lesson, as indicated in the Assessment Timetable (Figure K.3). The intent of the summative assessment is to measure and report student mastery of the assessed standards/skills (The Iris Center, 2006). Teachers can also use this summative data to identify skills that need to be retaught, reinforced and/or to monitor student progress depending on timing of the summative assessment within the school year (The Iris Center, 2006).

Data-Driven Instruction

Collecting & Analyzing the Data

Directions within each diagnostic, mastery measure, and summative assessment include guidance for data collection and scoring. The Spanish Progress Monitoring Guide, along with the informal, in-the-moment assessment ideas and accompanying resources (i.e., Reading Workouts, Prompting Guide, activities within lesson, and data tools) include useful information related to collecting and analyzing formative data as well.

Graphing data is an effective means to easily understand, analyze, use, and communicate progress with key stakeholders. The Just Right Reader Assessment program includes graph templates (with guidance on how to utilize them) that educators can use to help identify patterns, trends, relationships and outlying data, as well as to communicate individual student and/or class progress. A graph for students to monitor their progress toward curriculum-based standards and skills is also included. The Collecting & Analyzing Data table (Figure K.4) lists recommended assessment tools and includes the purpose of the tool as well.

Figure K.4: Collecting & Analyzing Data

Diagnostic Assessment: Collecting & Analyzing the Data		
Level of Analysis	Assessment Tool	Purpose of Tool
Student/Class	<u>SP Diagnostic Phonics Skills Graph (K-2)</u>	to determine flexible grouping; to assess class baseline general knowledge; to determine students’ learning needs and to inform instruction
Student/Class	<u>SP Phonological Awareness Checklist (KG)</u>	to track students’ mastery of curriculum-based skills (general) and to inform flexible grouping; to determine students’ learning needs and to inform instruction
	<u>SP Phonics Skills Checklist (K-2)(b)</u>	

Level of Analysis	Assessment Tool	Purpose of Tool
	<u>SP Alphabetic Principles: Letter Recognition, Letter Sound Recognition Checklist (KG).</u> <u>SP Phonics Skills: Decoding/Encoding Checklist (KG).</u>	to track students' mastery of curriculum-based skills (standard-specific) and to inform flexible grouping; to determine students' learning needs and to inform instruction
Student	<u>SP Baseline Assessment: Connected Text Fluency.</u>	to document students' baseline understanding of phonological awareness (blending & segmenting sounds), phonics, fluency, and comprehension using connected text; to determine students' learning needs and to inform instruction
Student	Self-Monitoring: <u>SP My Literacy Journey (Student Tracker) (K-2).</u>	for students to set goal(s), track progress toward meeting those goals, and to track mastery of phonics skills

Formative Assessment: Collecting & Analyzing the Data

Level of Analysis	Assessment Tool	Purpose of Tool
	<u>SP Small Group Reading Observation Form (K-2).</u>	to track observations of students' learning and instructional next steps during small group learning
	<u>SP Phonological Awareness Checklist (KG).</u>	to monitor students' growth and mastery of curriculum-based skills
Student/Class	<u>SP Phonics Skills Checklist (K-2) (b).</u>	to monitor students' mastery of general phonics skills (e.g., VC & CVC, digraphs)
	<u>SP Phonics Skills: Decoding/Encoding Checklist (KG).</u>	to monitor students' mastery of decoding and encoding specific phonics skills (e.g., digraph -ch)
	<u>SP Alphabetic Principles: Letter Recognition, Letter Sound Recognition Checklist (KG).</u>	to monitor students' mastery of alphabetic principles
Student	<u>SP Phonics & Fluency Monitoring Form (K-2).</u>	to monitor errors in targeted phonics skill application, lapses in engagement and confidence, notes on student interaction and participation and observations related to fluency trends

Level of Analysis	Assessment Tool	Purpose of Tool
	<u>SP Phonics Skills Checklist (K-2).(a).</u>	to monitor what students can do, strengths and areas for improvement and to inform instruction
Student	Self-Monitoring: <u>SP My Literacy Journey (Student Tracker).(K-2).</u>	for students to set goal(s), track progress toward meeting those goals, and to track mastery of phonics skills

Summative Assessment: Collecting & Analyzing the Data

Level of Analysis	Assessment Tool	Purpose of Tool
Class	<u>SP Summative Assessment: Class Scores Graph (KG).</u>	to monitor the class's average score on each summative assessment
Student/Class	<u>SP Phonological Awareness Checklist (KG).</u>	to monitor student's progress toward and mastery of curriculum-based skills (general)
	<u>SP Phonics Skills Checklist (K-2).(b).</u>	to monitor student's mastery of curriculum-based skills (general)
	<u>SP Phonics Skills: Decoding/Encoding Checklist (KG).</u>	to monitor student's mastery of curriculum-based skills (standard-specific)
	<u>SP Alphabetic Principles: Letter Recognition, Letter Sound Recognition Checklist (KG).</u>	to monitor student's mastery of curriculum-based skills (standard-specific)
Student	Self-Monitoring: <u>SP My Literacy Journey (Student Tracker).(K-2).</u>	for students to set goal(s), track progress toward meeting those goals, and to track mastery of phonics skills

Using the Data

Diagnostic

Educators use diagnostic assessments to “diagnose” knowledge, skills, and abilities students have already mastered (their strengths) and skills students have not yet learned or mastered. Teachers use the diagnostic results to guide them as they decide next instructional steps to support or to enrich students’ learning during whole-class, small-group, and/or personalized instruction.

For students who enroll after the beginning of the school year, diagnostic data can provide evidence of any strengths and/or skill gaps so educators can plan accordingly. If skill gaps exist, educators can plan to accelerate instruction, closing gaps quickly with targeted intervention and progress monitoring.

Example Scenario

A student enrolls in the second semester and the teacher administers the Spanish Diagnostic Assessment (Phonics) (K-2). The data indicates the student can not yet recognize all the letter names and sounds. The teacher realizes the need to accelerate this student's learning of letter names and sounds to close the skill gap. With the error analysis of the diagnostic data, it is determined which specific letter names and sounds the student does not yet recognize, and plans are made to address these gaps during small group instruction. The What's My Sound activity from the Reading Workouts and suggestions from the Decoding section of the Prompting Guide is then utilized. The teacher will also plan to administer the Spanish Mastery Measures for both letter names and letter sounds as needed to monitor this student's progress toward those skills.

Formative

Educators also use formative assessments to identify students' learning strengths and areas of need so they can adjust their instruction to provide targeted, differentiated support and enrichment. Educators use the in-the-moment, informal formative assessment data they collect to immediately adjust instruction on-the-fly. Feedback is specific, and teacher action is immediate

Example Scenario A: continuing the example scenario above

The teacher continues to informally assess the student's application of letter sound recognition and application to reading during instruction as the student engages with the Just Right Reader Decodable texts. Following the steps in the Progress Monitoring Guide, a new section from the Decodable is assigned. Next, the teacher observes and records phonics applications, looking specifically for mastery of those target skills identified by the diagnostic assessment, on the Small Group Reading Observation Form. Immediate feedback is provided as the student reads the target letter sounds correctly or incorrectly, using prompts from the Prompting Guide, such as "What does that letter say?" and/or "Does that sound like a word you know?"

Example Scenario B

An educator is teaching a small group lesson. Within the lesson, students are asked to provide a thumbs up if two words rhyme and a thumbs down if the words do not rhyme. A student consistently answers incorrectly implying the phonological awareness skill has not been mastered. On-the-fly, additional, quick explicit instruction of rhyming words is provided for this student while the other students engage in a rhyming picture card game, practicing the skills they've just learned. After a few rounds of guided, accurate practice, the student is no longer "stuck" on this skill, and is soon able to join the others in playing the card game while the educator observes and offers necessary feedback.

Example Scenario C

Late in the school year, an educator is teaching a small group of students who have demonstrated advanced understanding of decoding digraphs according to diagnostic assessment and formative fluency monitoring. Instead of guided decoded practice, students are assigned independent decoding practice and partner-reading, while listening in as students read. Noticing some weaknesses with prosody and reading rate, the Prompting Guide is used to offer in-the-moment explicit instruction related to these two aspects of fluency and additional guided practice providing students with encouragement and feedback throughout. Observations are noted on the Just Right Reader Data Tools (e.g., Small Group Reading Observation Form and Phonics & Fluency Monitoring Form).

The Prompting Guide provides additional ideas of how to interpret and respond in-the-moment while students are reading. It addresses common breakdowns that occur when students are practicing reading and writing. Prompts remind students of what they already know and support them to apply what has been taught.

Educators also use more formal, formative assessments, such as Mastery Measures (progress monitoring probes). Unlike in-the-moment formative assessments, data analysis and teacher action are delayed in mastery measurements—adapting of instruction doesn't occur immediately. Mastery Measures evaluate a student's understanding of a single target skill to ensure mastery before moving on to the next skill (The Iris Center, 2024). Each of the Just Right Reader Mastery Measures contains ten different probes assessing the same skill so students have frequent, repeated opportunities to show mastery of the target skill(s).

Summative

Educators use summative assessments to "sum up" students' learning of grade-level standards and skills. Oftentimes, summative assessments are used in grading/reporting to communicate student's mastery. Since students don't have the opportunity to better their performance on these assessments, they are summative; however, depending on when during the school year the assessment is administered, educators can use the data from summative assessments to tailor future instruction to individual student's needs. If a student showed they did not master the

digraph -ch on the summative assessment, for example, the teacher would continue to fold this skill into their small group instruction, ensuring mastery of the skill even though it has already been assessed summatively.

Involving Key Stakeholders: Communicating the Data

Student Involvement

Educators should communicate assessment data with students and involve them in monitoring their progress. If students are aware of the skills they have already mastered and those which they still need to learn, with educator help, they can set goals and in turn increase or sustain motivation. The Just Right Reader Assessment Program includes recommended data tools to engage students in self-monitoring.

Example Scenario

An educator administers the diagnostic assessment at the beginning of the school year and plans to introduce students to goal setting and the Spanish: My Literacy Journey (Student Tracker) shortly after. As part, the educator shares with a student mastery of all Uppercase Letter Names, almost all Lowercase Letter Names, and has already mastered ten letter sounds. The student is pleased to hear all of their learning and to place star stickers on the mastered skills on the Spanish: My Literacy Journey (Student Tracker). The student is eager to learn (and place more stars), so the educator helps the student formulate a student-friendly goal: "I will name the lowercase letters e, r, d, i and t and continue to practice my letter sounds." As the student learns the letter names and sounds and demonstrates mastery, with teacher guidance, additional stars are placed on the chart.

Note: As indicated within the teacher directions/exemplar, because the tracker includes all skills in the K-2 progression, the teacher will want to edit and personalize the tracker, narrowing the content to only those skills the student is striving to master within their goal or to those skills combined with just one or two skills beyond what the student has set as their goal. The reason skills have not been separated by grade-level standards is to account for those students who have advanced beyond grade level skills and those who are working on skills below grade-level.

Other Stakeholder Involvement

In addition to sharing with and involving students in monitoring their progress and achievement, educators should consider the following ideas for communicating data, using the varied data templates and tools, with other key stakeholders:

- Professional Learning Communities (PLCs): Within a PLC, teachers can share class-level data. They can discuss their individual class' areas of strength and weakness, any additional data observations, and then collaborate to analyze the data and plan for instruction based on the analysis.

- Administrators: Educators can share and discuss class-level data (as well as individual-student data, as appropriate) with administrators. These stakeholders can use the data to gauge effectiveness of curriculum and/or instruction and to problem solve accordingly.
- Intervention and/or Enrichment Program Personnel: Communicating students' present levels of performance, current goals and progress toward those goals with key stakeholders is important. Additionally, general education teachers should share students' histories of targeted instruction and/or interventions or enrichment and academic as well as behavioral observations so they can collaborate with other program-specific educators and/or administrators to decide best instructional programs and supports for students based on their unique needs.
- Parents/Caregivers: While using the data templates/graphs is helpful for all stakeholders, sharing these visuals with parents/caregivers is integral, as they often don't have the familiarity with the educational assessments and data gleaned that other stakeholders have. Sharing graphs denoting students' progress, such as the students' Spanish: My Literacy Journey Trackers with parents during formal conferences and/or meetings is a great way to ensure parent engagement and involvement in student learning.

First Grade Assessments

Overview

Texas educators should ensure use of a comprehensive assessment program, incorporating a variety of diagnostic, formative, and summative assessments to assess the foundational literacy skills outlined in the Texas Essential Knowledge & Skills (TEKS). Teachers should collect assessment data before, during, and after learning. They should also choose the appropriate combinations of assessments based on educational purpose and understand how to collect the data so it is reliable and valid, how to organize the data so it is easy to read and analyze, and how to best use and communicate the data to ensure students develop and sustain foundational literacy skills.

Figure 1.2 provides an overview of the TEKS foundational literacy standards and learning objectives First Grade students must master to be skilled readers. Moreover, the table provides a map of the varied assessments within the Just Right Reader Assessment Program, categorizing each assessment by purpose as well as aligning the assessments with grade-level TEKS standards.

The Spanish First Grade Assessment Timetable (Figure 1.3) follows the systematic Just Right Reader Spanish Progression. It includes direction regarding whether all students or a subgroup of students should be assessed and recommendations for frequency and timing of assessment administration dependent on assessment purpose. How to prepare for, administer, and score the assessment as well as reminders or tips related to data collection are within the directions for each assessment within the Just Right Reader Assessment Program.

While some assessments are First Grade-specific, assessing only those skills included in First Grade TEKS standards, other assessments include skills included in the Kindergarten and/or Second Grade TEKS standards, and are labeled with a K-2 designation. The reason is based on assessment purposes. For example, a diagnostic assessment is meant to “diagnose” what students have already learned prior to instruction, and some students may have not learned skills that were previously taught or may have already learned skills that are designated in other grade levels. Including the option to show what they know related to these standards and skills will provide teachers with data to provide support or enrichment for these students so they too demonstrate growth. A second example is the progress monitoring Mastery Measures. These assessments are designated K-2 because a 1st grader, for example, could be working toward mastery of a Kindergarten-level skill. Educators can use the progress monitoring measures to best fit students’ needs based on other assessment data collected.

Summative	Spelling Tests [See Spelling (1G) Lesson.]	Lesson/ Unit	All	Weekly to Bi-Weekly	throughout Sets 11-31

Diagnostic Assessments

Just Right Reader has included a First Grade course-level diagnostic. This formal, standardized diagnostic assessment evaluates curriculum-based phonics skills that will be learned over the school year and provides a baseline of performance. As indicated in Figure 1, this diagnostic assessment should be administered before instruction of the assessed skills begins and can assist educators in organizing students for small group instruction (TEA, 2023). Detailed guidance regarding who should be assessed using the Diagnostic Assessment, which section(s) to administer, when to administer the assessment, and how to administer this assessment is included in part in Figure 1.3: Spanish First Grade Assessment Timetable and in total within the Spanish Diagnostic Assessment (Phonics) Administration Guide (Appendix A).

Formative Assessments

Formative assessments occur during learning. “In-the-moment” or “on-the-fly” assessments happen during a lesson or activity (NCTE, p. 3). Others are more formal and are decided before instruction is planned or are embedded in the curriculum and used to gather data at significant points during the learning process (NCTE, p. 3). All seek to understand students’ current levels of performance and to use teacher’s knowledge and expertise regarding the curriculum and pedagogy to refine practice and improve student learning (NCTE, p. 2).

Educators utilize assessment tools, such as checklists, rubrics, and observation forms, to frequently assess students’ progress toward and mastery of phonological awareness, phonics (decoding and encoding, including high frequency words), and fluency skills during day-to-day, lesson-embedded activities. Several varied, in-the-moment formative assessment tool templates, including digital, editable copies, are provided within the Just Right Reader Assessment Program. In addition, Just Right Reader’s supplemental Progress Monitoring Guide includes step-by-step guidance to monitor progress using planned, formative assessment with a combination of data tools.

Mastery Measures (skill-based probes) are more formal progress monitoring assessments included in the Just Right Reader Assessment Program. These Mastery Measures evaluate student performance one skill at a time to ensure mastery before moving to the next skill (The Iris Center, 2024). Detailed guidance regarding who should be assessed using Mastery Measures, which measure(s) to administer, when to administer the probe(s), and how to administer these progress monitoring assessments is included in part in Figure 1.3: Spanish First Grade Assessment Timetable and in total within the *Mastery Measure Administration Guide* (Appendix B).

Summative Assessments

Just Right Reader’s First Grade Assessments include summative assessments (see Figure 1.2 and Appendix D). These standards-aligned assessments are a summation of learning and are administered at the end of each unit or lesson, as indicated in the Spanish Assessment Timetable (Figure 1.3). The intent of the summative assessment is to measure and report student mastery of the assessed standards/skills (The Iris Center, 2006). Teachers can also use this summative data to identify skills that need to be retaught, reinforced and/or to monitor student progress depending on timing of the summative assessment within the school year (The Iris Center, 2006).

Data-Driven Instruction

Collecting & Analyzing the Data

Directions within each diagnostic and summative assessment include guidance regarding data collection and scoring. The Progress Monitoring Guide, along with the informal, in-the-moment assessment ideas and accompanying resources (i.e., Reading Workouts, Prompting Guide, activities within lesson, and data tools), include useful information related to collecting and analyzing formative data as well.

Graphing data is an effective means to easily understand, analyze, use, and communicate progress monitoring data with key stakeholders. The Just Right Reader Assessment program includes graph templates (with guidance on how to use them) educators can use to help identify patterns, trends, relationships and outlying data as well as to communicate individual student and/or class progress. A graph for students to monitor their progress toward curriculum-based standards and skills is also included. The Collecting & Analyzing Data table (Figure 1.4) lists recommended assessment tools and includes the purpose of the tool as well.

Figure 1.4: Collecting & Analyzing Data

Diagnostic Assessment: Collecting & Analyzing the Data		
Level of Analysis	Assessment Tool	Purpose of Tool
Student/Class	<u>SP Diagnostic Phonics Skills Graph (K-2)</u>	to determine flexible grouping; to assess class baseline general knowledge and to determine students’ learning needs to inform instruction
Student	<u>SP Phonological Awareness Checklist (1G)</u>	to inform flexible grouping; to track students’ mastery of curriculum-based skills (general) and to determine students’ learning needs to inform instruction
	<u>SP Phonics Skills Checklist (K-2)(b)</u>	

Level of Analysis	Assessment Tool	Purpose of Tool
	<u>SP Phonics Skills: Decoding/Encoding Checklist (1G).</u>	to inform flexible grouping; to track students' mastery of curriculum-based skills (standard-specific) and to determine students' learning needs to inform instruction
	<u>SP Baseline Assessment: Connected Text Fluency</u>	to document students' baseline understanding of phonological awareness (blending & segmenting sounds), phonics, fluency, and comprehension using connected text and to determine students' learning needs to inform instruction
Student	Self-Monitoring: <u>SP My Literacy Journey (Student Tracker) (K-2).</u>	to teach students to set goal(s), self-monitor progress toward meeting those goals, and to track mastery of curriculum-based skills

Formative Assessment: Collecting & Analyzing the Data

Level of Analysis	Assessment Tool	Purpose of Tool
Student/Class	<u>SP Small Group Reading Observation Form (K-2).</u>	to track observations of students' learning and instructional next steps during small group instruction
	<u>SP Phonological Awareness Checklist (1G).</u>	to monitor students' mastery of curriculum-based skills
	<u>SP Phonics Skills Checklist (K-2)(b).</u>	
	<u>SP Phonics Skills: Decoding/Encoding Checklist (1G).</u>	to monitor students' mastery of decoding and encoding specific curriculum-based skills
Student	<u>SP Phonics & Fluency Monitoring Form (K-2).</u>	to monitor errors in targeted phonics skill application, lapses in engagement and confidence, notes on student interaction and participation and observations related to fluency trends

Level of Analysis	Assessment Tool	Purpose of Tool
	<u>SP Phonics Skills Checklist (K-2)(a)</u>	to monitor what students can do, strengths and areas for improvement and to inform instruction
	Self-Monitoring: <u>SP My Literacy Journey (Student Tracker)(K-2)</u>	to teach students to set goal(s), self-monitor progress toward meeting those goals, and to track growth and mastery of curriculum-based skills

Summative Assessment: Collecting & Analyzing the Data

Level of Analysis	Assessment Tool	Purpose of Tool
Class	<u>SP Summative Assessment: Class Scores Graph (1G)</u>	to monitor the class's average score on each summative assessment
Student/Class	<u>SP Phonological Awareness Checklist (1G)</u>	to monitor students' mastery of curriculum-based skills (general)
	<u>SP Phonics Skills Checklist (K-2)(b)</u>	
	<u>SP Phonics Skills: Decoding/Encoding Checklist (1G)</u>	to monitor students' mastery of curriculum-based skills (standard-specific)
Student	Self-Monitoring: <u>SP My Literacy Journey (Student Tracker)(K-2)</u>	for students to set goal(s), track progress toward meeting those goals, and to track mastery of phonics skills

Using the Data

Diagnostic

Educators use diagnostic assessment to “diagnose” knowledge, skills, and abilities students already know (their strengths) and skills students have not yet learned or mastered. Teachers use the diagnostic results to guide them as they decide next instructional steps to support or to enrich students’ learning during whole-class, small-group, and/or personalized instruction.

For students who enroll after the beginning of the school year, diagnostic data can provide evidence of any strengths and/or skill gaps so educators can plan accordingly. If skill gaps exist, educators can plan to accelerate instruction, closing gaps quickly with targeted intervention and progress monitoring.

Example Scenario

A student enrolls in the second semester and the teacher administers the Diagnostic Assessment (Phonics) (K-2). The data indicates the student can not yet recognize all the letters' sounds, a Kindergarten-level skill. The teacher realizes the need to accelerate this student's learning of letter sounds to close this large skill gap. With the error analysis of the diagnostic data, it is determined which specific letter sounds the student does not yet know. Plans are made to address these gaps during small group instruction, using the What's My Sound activity from the Reading Workouts and suggestions from the Decoding section of the Prompting Guide. The teacher also plans to administer the Mastery Measures for letter sounds twice per week to monitor this student's progress toward this skill.

Formative

Educators also use formative assessments to identify students' learning strengths and areas of need so they can adjust their instruction to provide targeted, differentiated support and enrichment. Educators use the in-the-moment, informal formative assessment data they collect to immediately adjust instruction on-the-fly. Feedback is specific, and teacher action is immediate.

Example Scenario A: (continuing the example scenario above)

The teacher continues to informally assess the student's application of letter sound recognition and application to reading during instruction as the student engages with the Just Right Reader decodable texts. Following the steps in the Progress Monitoring Guide, a new section from the decodable is assigned. The teacher observes and records phonics applications, looking specifically for mastery of those target skills identified through the diagnostic assessment, on the Small Group Reading Observation Form. Immediate feedback is provided as the student reads the target letter sounds correctly or incorrectly, using prompts from the Prompting Guide, such as "What does that letter say?" and/or "Does that sound like a word you know?"

Example Scenario B

An educator is teaching a small group lesson. Within the lesson, students are asked to produce a series of rhyming words. A student consistently answers incorrectly uncovering the student has not yet mastered the phonological awareness skill. On-the-fly, additional, quick explicit instruction of rhyming words if used for this student with two rhyming words, asking the student to first identify if the words rhyme while the other students continue to create a series of rhyming words. After a few rounds of guided, accurate practice using two words, the student is asked to produce three rhyming words. The student is no longer "stuck" on this skill and is able to join the others in creating a series of rhyming words.

Example Scenario C

Late in the school year, an educator is teaching a small group of students who have demonstrated advanced understanding of decoding words with ca, co, cu, ce, and ci according to the diagnostic assessment and formative fluency monitoring. Instead of guided decoded practice, independent decoding practice is assigned, asking students to partner-read, listening in as students read. Noticing some weaknesses with prosody and reading rate, the Prompting Guide is used, and in-the-moment, explicit instruction related to these two aspects of fluency, and additional guided practice providing the students with encouragement and feedback throughout is utilized. Observations are noted using Just Right Reader Data Tools (e.g., Small Group Reading Observation Form and Phonics & Fluency Monitoring Form).

The Prompting Guide provides additional ideas of how to interpret and respond in-the-moment while students are reading. It addresses common breakdowns that occur when students are practicing reading and writing. Prompts remind students of what they already know and support them to apply what has been taught.

Educators also use more formal, formative assessments, such as Mastery Measures (progress monitoring probes). Unlike in-the-moment formative assessments, data analysis and teacher action are delayed in mastery measurements—the changes to instruction don't happen immediately. Mastery Measures evaluate a student's understanding of a single target skill to ensure mastery before moving on to the next skill (The Iris Center, 2024). Each of the Just Right Reader Mastery Measures contains ten different probes assessing the same skill so students have frequent, repeated opportunities to show mastery of the target skill(s).

Summative

Educators use summative assessments to “sum up” students' learning of grade-level standards and skills. Oftentimes, summative assessments are used in grading/reporting to communicate student's mastery. Because students don't have the opportunity to better their performance on these assessments, they are summative; however, depending on when during the school year the assessment is administered, educators can use the data from summative assessments to tailor future instruction to individual student's needs. If a student showed they did not master the digraph -ch on the summative assessment, for example, the teacher would continue to fold that skill into the student's small group instruction, ensuring mastery of the skill even though it has already been assessed summatively.

Involving Key Stakeholders: Communicating the Data

Student Involvement

Educators should communicate assessment data with students and involve them in monitoring their progress. If students are aware of the skills they have already mastered and those which they still need to learn, with educator help, they can set goals and in turn increase or sustain motivation. The Just Right Reader Assessment Program includes recommended data tools to engage students in self-monitoring.

Example Scenario

An educator administers the diagnostic assessment at the beginning of the year and plans to introduce students to goal setting and My Literacy Journey (Student Tracker) shortly after. As part, the educator shares with a student mastery of all CVC short vowel sounds, almost all digraphs, and has already mastered some beginning blends. The student is pleased to hear their learning and to place star stickers on the skills already mastered on the My Literacy Journey (Student Tracker). The student is eager to learn (and place more stars), so the educator helps the student formulate a student-friendly goal: I will learn the digraphs ch and rr and continue to practice my beginning blends. As the student learns the digraphs and blends and demonstrates mastery, with teacher guidance, additional stars are placed on the chart.

Note: As indicated within the teacher directions/exemplar, because the tracker includes all skills in the K-2 progression, the teacher will want to edit and personalize the tracker, narrowing the content to only those skills the student is striving to master within their goal or to those skills combined with just one or two skills beyond what the student has set as their goal. The reason skills have not been separated by grade-level standards is to account for those students who have advanced beyond grade level skills and those who are working on skills below grade-level.

Other Stakeholder Involvement

In addition to sharing with and involving students in monitoring their progress and achievement, educators should consider the following ideas for communicating data, using the varied data templates and tools, with other key stakeholders:

- Professional Learning Communities (PLCs): Within a PLC, teachers can share class-level data. They can discuss their individual class' areas of strength and weakness and any additional data observations and then collaborate to analyze the data and plan for instruction based on the analysis.
- Administrators: Educators can share and discuss class-level data (as well as individual-student data, as appropriate) with administrators. These stakeholders can use the data to gauge effectiveness of curriculum and/or instruction and to problem solve accordingly.
- Intervention and/or Enrichment Program Personnel: Communicating students' present levels of performance, current goals and progress toward those goals with key stakeholders is important. Additionally, general education teachers should share students' histories of targeted instruction and/or interventions or enrichment and academic as well as behavioral observations so they can collaborate with other program-specific educators and/or administrators to decide best instructional programs and supports for students based on their unique needs.

- Parents/Caregivers: While using the data templates/graphs is helpful for all stakeholders, sharing these visuals with parents/caregivers is integral, as they often don't have the familiarity with the educational assessments and data gleaned that other stakeholders have. Sharing graphs denoting students' progress, such as the students' Spanish My Literacy Journey Trackers with parents during formal conferences and/or meetings is a great way to ensure parent engagement and involvement in student learning.

Second Grade Assessments

Overview

Texas educators should ensure the use of a comprehensive assessment program, incorporating a variety of diagnostic, formative, and summative assessments to assess the foundational literacy skills outlined in the Texas Essential Knowledge & Skills (TEKS). Teachers should collect assessment data before, during, and after learning. They should also choose the appropriate combinations of assessments based on educational purpose and understand how to collect the data so it is reliable and valid, how to organize the data so it is easy to read and analyze, and how to best use and communicate the data to ensure students develop and sustain foundational literacy skills.

Figure 2.2 provides an overview of the TEKS foundational literacy standards and learning objectives Second Grade students must master to be skilled readers. Moreover, the table provides a map of the varied assessments within the Just Right Reader Assessment Program, categorizing each assessment by purpose as well as aligning the assessments with grade-level TEKS standards.

The Spanish Second Grade Assessment Timetable (Figure 2.3) follows the systematic Just Right Reader Spanish Progression. It includes direction regarding whether all students or a subgroup of students should be assessed and recommendations for frequency and timing of assessment administration dependent on assessment purpose. How to prepare for, administer, and score the assessment as well as reminders or tips related to data collection are within the directions for each assessment within the Just Right Reader Assessment Program.

While some assessments are Second Grade-specific, assessing only those skills included in Second Grade TEKS standards, other assessments include skills included in the Kindergarten and/or First Grade TEKS standards, and are labeled with a K-2 designation. The reason is based on assessment purpose. For example, a diagnostic assessment is meant to “diagnose” what students have already learned prior to instruction, and some students may have not learned skills previously taught or may have already learned skills that will be taught later in the year. Including the option to show what they know related to these standards and skills will provide teachers with data to provide support or enrichment for these students so they too demonstrate growth. A second example is the progress monitoring Mastery Measures. These assessments are designated K-2 because a 1st grader, for example, could be working toward mastery of a Kindergarten-level skill. Educators can use the progress monitoring measures to best fit students’ needs based on other assessment data collected.

Diagnostic Assessments

Just Right Reader has included a Second Grade course-level diagnostic. This formal, standardized diagnostic assessment measures curriculum-based phonics skills learned over the school year and provides a baseline of performance. As indicated in Figure 1, this diagnostic assessment should be administered before instruction of the assessed skills begins and can assist educators in organizing students for small group instruction (TEA, 2023). Detailed guidance regarding who should be assessed using the Diagnostic Assessment, which section(s) to administer, when to administer the assessment, and how to administer this assessment is included in part in Figure 2.3: Spanish Second Grade Assessment Timetable and in total within the Spanish Diagnostic Assessment (Phonics) Administration Guide (Appendix A).

Formative Assessments

Formative assessments happen during learning. “In-the-moment” or “on-the-fly” assessments happen during a lesson or activity (NCTE, p. 3). Others are more formal and are decided before instruction or are embedded in the curriculum and used to gather data at significant points during the learning process (NCTE, p. 3). All seek to understand students’ current levels of performance and to use teacher’s knowledge and expertise regarding the curriculum and pedagogy to refine practice and improve student learning (NCTE, p. 2).

Educators utilize assessment tools, such as checklists, rubrics, and observation forms, to frequently assess students’ progress toward and mastery of phonological awareness, phonics (decoding and encoding, including high frequency words), and fluency skills during day-to-day, lesson-embedded activities. Several varied, in-the-moment formative assessment tool templates, including digital, editable copies, are provided within the Just Right Reader Assessment Program. In addition, Just Right Reader’s supplemental Progress Monitoring Guide includes step-by-step guidance to monitor progress using planned, formative assessment with a combination of data tools.

Mastery Measures (skill-based probes) are more formal progress monitoring assessments included in the Just Right Reader Assessment Program. These Mastery Measures evaluate student performance one skill at a time to ensure mastery before moving to the next skill (The Iris Center, 2024). Detailed guidance regarding who should be assessed using Mastery Measures, which measure(s) to administer, when to administer the probe(s), and how to administer these progress monitoring assessments is included in part in Figure 2.3: Second Grade Assessment Timetable and in total within the *Mastery Measure Administration Guide* (Appendix B).

Summative Assessments

Just Right Reader’s Spanish Second Grade Assessments include summative assessments (see Figure 2.2 and Appendix E). These standards-aligned assessments are a summation of learning and are administered at the end of each unit or lesson, as indicated in the Assessment Timetable (Figure 2.3). The intent of the summative assessment is to measure and report student mastery of the assessed standards/skills (The Iris Center, 2006). Teachers can also use this summative data to identify skills that need to be retaught, reinforced and/or to monitor student progress depending on timing of the summative assessment within the school year (The Iris Center, 2006).

Data-Driven Instruction

Collecting & Analyzing the Data

Directions within each diagnostic and summative assessment include guidance regarding data collection and scoring. The Progress Monitoring Guide, along with the informal, in-the-moment assessment ideas and accompanying resources (i.e., Reading Workouts, Prompting Guide, activities within lesson, and data tools), include useful information related to collecting and analyzing formative data as well.

Graphing data is an effective means to easily understand, analyze, use, and communicate progress monitoring data with key stakeholders. The Just Right Reader Assessment program includes graph templates (with guidance on how to use them) educators can use to help identify patterns, trends, relationships and outlying data as well as to communicate individual student and/or class progress. A graph for students to monitor their progress toward curriculum-based standards and skills is also included. The Collecting & Analyzing Data table (Figure 2.4) lists recommended assessment tools and includes the purpose of the tool as well.

Figure 2.4: Collecting & Analyzing Data

Diagnostic Assessment: Collecting & Analyzing the Data		
Level of Analysis	Assessment Tool	Purpose of Tool
Student/Class	<u>SP Diagnostic Phonics Skills Graph (K-2)</u>	to determine flexible grouping; to assess class baseline general knowledge and to determine students’ learning needs to inform instruction
Student	<u>SP Phonics Skills Checklist (K-2)_(b)</u>	to inform flexible grouping; to track students’ mastery of curriculum-based skills (general) and to determine students’ learning needs to inform instruction

Level of Analysis	Assessment Tool	Purpose of Tool
Student	<u>SP Phonics Skills: Decoding/Encoding Checklist (2G).</u>	to inform flexible grouping; to track students' mastery of curriculum-based skills (standard-specific) and to determine students' learning needs to inform instruction
	<u>SP Baseline Assessment: Connected Text Fluency</u>	to document students' baseline understanding of phonological awareness (blending & segmenting sounds), phonics, fluency, and comprehension using connected text and to determine students' learning needs to inform instruction
	<u>Self-Monitoring: SP My Literacy Journey (Student Tracker)(K-2).</u>	to teach students to set goal(s), self-monitor progress toward meeting those goals, and to track mastery of curriculum-based skills

Formative Assessment: Collecting & Analyzing the Data

Level of Analysis	Assessment Tool	Purpose of Tool
Student/Class	<u>SP Small Group Reading Observation Form (K-2).</u>	to track observations of students' learning and instructional next steps during small group instruction
	<u>SP Phonics Skills Checklist (K-2).(b).</u>	to monitor students' mastery of curriculum-based skills
	<u>SP Phonics Skills: Decoding/Encoding Checklist (2G).</u>	to monitor students' mastery of decoding and encoding specific curriculum-based skills
Student	<u>SP Phonics & Fluency Monitoring Form (K-2).</u>	to monitor errors in targeted phonics skill application, lapses in engagement and confidence, notes on student interaction and participation and observations related to fluency trends
	<u>SP Phonics Skills Checklist (K-2).(a).</u>	to monitor what students can do, strengths and areas for improvement and to inform instruction
	<u>Self-Monitoring: SP My Literacy Journey (Student Tracker)(K-2).</u>	to teach students to set goal(s), self-monitor progress toward meeting those goals, and to track growth and mastery of curriculum-based skills

Summative Assessment: Collecting & Analyzing the Data

Level of Analysis	Assessment Tool	Purpose of Tool
Class	<u>SP Summative Assessment: Class Scores Graph (2G)</u>	to monitor the class's average score on each summative assessment
Student/Class	<u>SP Phonics Skills Checklist (K-2) (b)</u>	to monitor students' mastery of curriculum-based skills (general)
	<u>SP Phonics Skills: Decoding/Encoding Checklist (2G)</u>	to monitor students' mastery of curriculum-based skills (standard-specific)
Student	Self-Monitoring: <u>SP My Literacy Journey (Student Tracker) (K-2)</u>	for students to set goal(s), track progress toward meeting those goals, and to track mastery of phonics skills

Using the Data

Diagnostic

Educators use diagnostic assessment to “diagnose” knowledge, skills, and abilities students already know (their strengths) and skills students have not yet learned or mastered. Teachers use the diagnostic results to guide them as they decide next instructional steps to support or to enrich students’ learning during whole-class, small-group, and/or personalized instruction.

For students who enroll after the beginning of the school year, diagnostic data can provide evidence of any strengths and/or skill gaps so educators can plan accordingly. If skill gaps exist, educators can plan to accelerate instruction, closing gaps quickly with targeted intervention and progress monitoring.

Example Scenario

A student enrolls in the second semester and the teacher administers the Diagnostic Assessment (Phonics) (K-2). The data indicates the student can not read digraphs in single syllable words, a First Grade-level skill. The teacher realizes the need to accelerate this student’s learning of digraphs to close this large skill gap. With the error analysis of the diagnostic data, it is determined which specific digraphs the student does not yet know, and plans are made to address these gaps during small group instruction, using the What’s My Sound activity from the Reading Workouts and suggestions from the Decoding section of the Prompting Guide. Plans are made to administer the Mastery Measures for digraphs twice per week to monitor this student’s progress toward this skill.

Formative

Educators also use formative assessments to identify students' learning strengths and areas of need so they can adjust their instruction to provide targeted, differentiated support and enrichment. Educators use the in-the-moment, informal formative assessment data they collect to immediately adjust instruction on-the-fly. Feedback is specific, and teacher action is immediate.

Example Scenario A

An educator is teaching a small group lesson. Within the lesson, students are asked to provide a thumbs up if a series of words rhyme and a thumbs down if the series of words do not rhyme. One student consistently answers incorrectly. The student has not yet mastered the phonological awareness skill. On-the-fly, additional, quick explicit instruction of a series of rhyming words is provided for this student while the other students engage in a rhyming picture card game, practicing the skills they've just learned. After a few rounds of guided, accurate practice, the student is no longer "stuck" on this skill, and is soon able to join the others in playing the card game while the educator observes and offers necessary feedback.

Example Scenario B

An educator is teaching a small group of students who are struggling to decode words with stress on the last syllable (palabras agudas). One student catches on quickly and shows mastery of palabras agudas during a Reading Workout activity, while the others continue to need guided practice and feedback. The student's progress is noted on the Small Group Reading Observation Form and then the educator immediately adjusts instruction to provide more explicit guided practice to the student. The student continues to learn and grow.

The Prompting Guide provides additional ideas of how to interpret and respond in-the-moment while students are reading. It addresses common breakdowns that occur when students are practicing reading and writing. Prompts remind students of what they already know and support them to apply what has been taught.

Educators also use more formal, formative assessments, such as Mastery Measures (progress monitoring probes). Unlike in-the-moment formative assessments, data analysis and teacher action are delayed in mastery measurements—the changes to instruction don't happen immediately. Mastery Measures evaluate a student's understanding of a single target skill to ensure mastery before moving on to the next skill (The Iris Center, 2024). Each of the Just Right Reader Mastery Measures contains ten different probes assessing the same skill so students have frequent, repeated opportunities to show mastery of the target skill(s).

Summative

Educators use summative assessments to “sum up” students’ learning of grade-level standards and skills. Oftentimes, summative assessments are used in grading/reporting to communicate student’s mastery. Because students don’t have the opportunity to better their performance on these assessments, they are summative; however, depending on when during the school year the assessment is administered, educators can use the data from summative assessments to tailor future instruction to individual student’s needs. If a student showed they did not master the digraph - ch on the summative assessment, for example, the teacher would continue to fold that skill into small group instruction, ensuring mastery of the skill even though it has already been assessed summatively.

Involving Key Stakeholders: Communicating the Data

Student Involvement

Educators should communicate assessment data with students and involve them in monitoring their progress. If students are aware of the skills they have already mastered and those which they still need to learn, with educator help, they can set goals and in turn increase or sustain motivation. The Just Right Reader Assessment Program includes recommended data tools to engage students in self-monitoring.

Example Scenario

An educator administers the diagnostic assessment at the beginning of the year and plans to introduce students to goal setting and the My Literacy Journey (Student Tracker) shortly after. As part, the educator shares with a student mastery of all digraphs and has almost mastered contrasts. The student is pleased to hear all of their learning and to place star stickers on the skills already mastered on the Spanish My Literacy Journey (Student Tracker). The student is eager to learn (and place more stars), so the educator helps the student formulate a student-friendly goal: I will learn the contrasts gue, gui vs güe, güi. As the student learns these contrasts and demonstrates mastery, with teacher guidance, additional stars are placed on the chart.

Note: As indicated within the teacher directions/exemplar, because the tracker includes all skills in the K-2 progression, the teacher will want to edit and personalize the tracker, narrowing the content to only those skills the student is striving to master within their goal or to those skills combined with just one or two skills beyond what the student has set as their goal. The reason skills have not been separated by grade-level standards is to account for those students who have advanced beyond grade level skills and those who are working on skills below grade-level.

Other Stakeholder Involvement

In addition to sharing with and involving students in monitoring their progress and achievement, educators should consider the following ideas for communicating data, using the varied data templates and tools, with other key stakeholders:

- **Professional Learning Communities (PLCs):** Within a PLC, teachers can share class-level data. They can discuss their individual class's areas of strength and weakness and any additional data observations and then collaborate to analyze the data and plan for instruction based on the analysis.
- **Administrators:** Educators can share and discuss class-level data (as well as individual-student data, as appropriate) with administrators. These stakeholders can use the data to gauge effectiveness of curriculum and/or instruction and to problem solve accordingly.
- **Intervention and/or Enrichment Program Personnel:** Communicating students' present levels of performance, current goals and progress toward those goals with key stakeholders is important. Additionally, general education teachers should share students' histories of targeted instruction and/or interventions or enrichment and academic as well as behavioral observations so they can collaborate with other program-specific educators and/or administrators to decide best instructional programs and supports for students based on their unique needs.
- **Parents/Caregivers:** While using the data templates/graphs is helpful for all stakeholders, sharing these visuals with parents/caregivers is integral, as they often don't have the familiarity with the educational assessments and data gleaned that other stakeholders have. Sharing graphs denoting students' progress, such as the students' Spanish My Literacy Journey Trackers with parents during formal conferences and/or meetings is a great way to ensure parent engagement and involvement in student learning.

Appendix A

Spanish Diagnostic Assessment (Phonics): Administration Guide

Preparation:

- **Spanish Diagnostic Assessment (Phonics) Administration Guide:** Read this administration guide prior to administering the assessment.
- **Spanish Diagnostic Assessment (Phonics) Response Record (one copy per student):** This assessment will be administered one student at a time. Ensure you have a copy of the Spanish Diagnostic Assessment (Phonics): Response Record (Figure 1) for each student. You will record individual student data.
- **Spanish Diagnostic Assessment (Phonics) Student Handout (one laminated copy):** Prior to administration, laminate a copy of the Spanish Diagnostic Assessment (Phonics): Student Handout. (Figure 2) You will use this handout to assess all students.
- **Blank Cardstock or Laminated Paper (one piece):** Have a thicker piece of paper available to hide or mask sections and/or rows of the Spanish Diagnostic Assessment (Phonics): Student Handout, showing only one subsection or row at a time.
- **Window Card (optional):** If a student is having difficulty focusing on one letter at a time, create a “window card.” (Cut a square the size of the letter in an index card so the letter will show through, but all other letters will be hidden from the student’s view.)

Administration:

- You will read from the script within this administration guide, and record individual student response data on a Spanish Diagnostic Assessment (Phonics) Response Record (Figure 1) for each student.
- The skills assessed within each subsection progress from least complex (i.e., Name the Letters: Uppercase) to most complex (i.e., Multisyllabic Words).
- Depending on skill-level, each student could begin at a different subsection and/or complete a different amount of subsection(s) of the diagnostic assessment. A recommended starting point, along with additional scoring and administration guidance, is detailed within Table 1: Administration Guidance.
- Hide or mask sections/subsections/rows/parts of the assessment as needed, using a sheet of blank, thicker paper or a “window card” as described in the Preparation section.

Scoring & Data Analysis:

- General scoring information is contained within this administration guide.
- Additional scoring information and data analysis resources (listed and hyperlinked below), including answers to the question “What do I do with the Diagnostic data?” referenced in the Just Right Reader Assessment & Progress Monitoring Guide are linked below.
 - [Spanish Diagnostic \(Phonics\) Graph \(K-2\)](#).
 - [Spanish Phonics Skills Checklist \(K-2\) \(b\)](#).
 - [Alphabet Principle: Spanish Letter Recognition & Letter Sound Recognition Checklist \(KG\)](#).
 - [Phonics Skills: Spanish Decoding/Encoding Checklist \(KG\)](#).
 - [Spanish Baseline Assessment: Connected Text Fluency Form](#)
 - [Self-Monitoring: Spanish My Literacy Journey Tracker \(K-2\)](#).

Table 1: Administration Guidance

Grade	Starting Point	Additional Administration Recommendations	
KG	<i>Alphabetic Principles: Name the Letters & Say the Sounds</i>	<p>If a student scores 92% or better on both Alphabetic Principles subsections, administer the Decoding subsections, beginning with VC & CVC and working toward more complex skills.</p> <p>If a student scores 50% or better on a Decoding subsection, administer the next, more complex Decoding subsection.</p>	<p>If a student scores below 50% on a Decoding subsection, stop the assessment.</p>
First Grade	<i>Decoding: Beginning Blends</i>	<p>If a student scores 50% or better on a Decoding subsection, administer the next, more complex Decoding subsection.</p>	<p>If a student scores below 50% on a Decoding subsection, administer the previous, less complex subsection until the student is able to score 50% or better on a subsection.</p>
Second Grade	<i>Decoding: Hard C/Soft G</i>		<p>Once a student scores 50% or better on a previous, less-complex subsection, stop the assessment.</p>

Alphabetic Principle: Letter Recognition

(Read the bolded sentences below exactly as written to ensure standardized administration.)

Say: **Vas a decir el nombre de estas letras. Primero, nombrarás estas letras.** (Run your finger across the first row of letters on the Spanish Diagnostic Assessment: Student Handout (Figure 2), showing the student which letters to read). **Señalarás cada letra mientras dices su nombre. ¿Listo? Empezarás aquí** (point to the first letter in the row) **y continuarás leyendo.** (Once the student has finished with the first row, run your finger across the second row of letters, showing which letters to read.) **Ahora, dirás el nombre de estas letras. Empezarás aquí** (point to the first letter in the second row) **y continuarás leyendo. Recuerda señalar cada letra mientras dices su nombre.**

Prompting, Scoring & Data Collection Guidance:

- As the student names the letters, mark those they named correctly in the space below each letter on the Spanish Diagnostic Assessment (Phonics) Response Record (Figure 1). Record the student's incorrect response(s) on the blank(s) below the letter(s).
- If a student gives an incorrect answer but immediately self-corrects, it is correct.
- If a student gives the letter sound instead of the letter name, say "¿Cuál es el nombre de esta letra?" (Point to the letter.)

- If a student provides the same letter sound or a different incorrect answer, it is an error. Record the student's incorrect response, and continue the assessment. Do not give corrective feedback.
- If a student is "stuck" and doesn't respond, say "¿Cuál es el nombre de esta letra?" (Point to the letter.) If the student does not know, leave the space blank below the letter, and encourage the student to continue on to the next letter, giving an opportunity to read all letters in the subsection.
- If a student becomes frustrated, stop and mark the stopping point, noting any pertinent observations in the Observation(s) space on page 4.
- Use this Observation(s) space to keep record of any additional, important observations or notes regarding the student's performance on this section of the assessment.

Alphabetic Principle: Letter Sound Recognition

(Read the bolded sentences below exactly as written to ensure standardized administration.)

Say: Vas a decir el sonido de estas letras. Primero, dirás los sonidos que hacen estas letras. (Run your finger across the first row of letters, showing the student which letters to read on the Spanish Diagnostic Assessment: Student Handout (Figure 2). **Señalarás cada letra mientras dices su sonido. ¿Listo? Empezarás aquí** (point to the first letter in the row) **y continuarás leyendo.** (Once the student has finished with the first row, run your finger across the second row of letters, showing which letters to read.) **Ahora, dirás el sonido de estas letras. Empezarás aquí** (point to the first letter in the second row) **y continuarás leyendo. Recuerda señalar cada letra mientras dices su sonido.**

Prompting, Scoring & Data Collection Guidance:

- As the student says the sound, mark those they name correctly in the space below each letter on the Spanish Diagnostic Assessment (Phonics) Response Record (Figure 1). Record the student's incorrect response(s) on the blank(s) below the letter(s).
- If a student gives an incorrect answer but immediately self-corrects, it is correct.
- If a student gives the letter name instead of the letter sound, say "¿Cuál es el sonido de esta letra?" (Point to the letter.)
 - If a student provides the same letter name or a different incorrect answer, it is an error. Record the student's incorrect response.
 - If a student is "stuck" and doesn't respond, say "¿Cuál es el sonido de esta letra?" (Point to the letter.) If the student does not know, leave the space blank below the letter. Instruct the student to look at the next letter(s), giving the opportunity to name all that they know.
- If a multilingual student confuses the vowel sounds and provides the answer in English or gives the soft sounds of c and g instead of the hard sounds, say "¿Cuál es el sonido de esta letra en español?" or "¿Cuál es el otro sonido que hace esta letra?"
 - If a student provides the same or a different incorrect answer, it is an error. Record the student's incorrect response, and continue the assessment. Do not give corrective feedback.
 - If a student is "stuck" and does not know, leave the space blank below the letter, and encourage the student to continue on to the next letter, giving an opportunity to read all letters in the subsection.

- If a student becomes frustrated, stop and mark the stopping point, noting any pertinent observations in the Observation(s) space on page 4.
- Use the Observation(s) space to keep record of any additional, important observations or notes regarding the student’s performance on this section of the assessment.

Student Handout

Decoding

(Read the bolded sentences below exactly as written to ensure standardized administration.)

Say: Vas a leer algunas palabras hoy. Algunas de estas palabras no son globales. Son palabras inventadas o palabras sin sentido. Comenzarás con la primera palabra y leerás de principio a fin.

Prompting, Scoring & Data Collection Guidance:

- As the student reads each word, mark those they name correctly in the space below each word on the Spanish Diagnostic Assessment (Phonics) Response Record (Figure 1). Record the student’s incorrect response(s) on the blank(s) below the word(s).
- If a student gives an incorrect answer but immediately self-corrects, it is correct.
- If a student is “stuck” and doesn’t respond, say “¿Qué palabra es esta?” (pointing to the word). If the student does not know, leave the space blank beside the letter, and encourage the student to continue on to the next word, giving an opportunity to read all words in the subsection.
- If a student becomes frustrated, stop and mark the stopping point, noting any pertinent observations in the Observation(s) space on page 4.
- Use this Observation(s) space to keep record of any additional, important observations or notes regarding the student’s performance on this section of the assessment.

Observation(s):

Appendix B

Spanish Mastery Measures (Phonics): Administration Guide

Preparation

- **Spanish Mastery Measures (Phonics) Administration Guide:** Read this administration guide prior to administering the first Mastery Measure probe.
- **Spanish Mastery Measures (Phonics) Response Record (one copy per student):** This assessment will be administered one student at a time. Ensure you have a copy of the *Spanish Mastery Measures (Phonics) Response Record* (Figure 2) for each probe you plan to administer. You will record individual student data.
- **Spanish Mastery Measures (Phonics) Student Handout (one laminated copy):** Prior to administration, laminate a copy of the *Spanish Mastery Measures (Phonics) Student Handout* (Figure 1) for the probe(s) you plan to administer to student(s). You will reuse this one copy for each administration of that probe(s).
- **Blank Cardstock or Laminated Paper (one piece):** Have a thicker piece of paper available to hide or mask section(s) of the *Spanish Mastery Measures (Phonics) Student Handout* (Figure 1), showing only one probe at a time.

Administration

- You will administer the assessment one student at a time. You will read from the script within this administration guide, and record individual student response data on a *Spanish Mastery Measures (Phonics) Response Record* (Figure 2) that corresponds to the selected probe(s) for each student.
- The skills assessed within each of the ten probes on one page mirror one another and are meant to be administered bi-weekly, weekly, or twice-per-week over the course of twenty, ten or five weeks, depending on student need. (See *Table 1: Administration Guidance*.)
- Hide or mask probes that will be administered at a later date as needed, using a sheet of blank, thicker paper as described in the Preparation section.

Scoring & Data Analysis

- General scoring information is contained within this administration guide.
- You'll find additional scoring information and data analysis resources (listed and hyperlinked below), including answers to the question "What do I do with the *Spanish Mastery Measures (Phonics)* data? referenced in the *Spanish Just Right Reader Assessment Guide*.
- [*Spanish Phonics Skills Checklist \(K-2\) \(a\)*](#)
- [*Spanish Phonics Skills Checklist \(K-2\) \(b\)*](#)
- [*Alphabet Principle: Spanish Letter Recognition & Letter Sound Recognition Checklist \(KG\)*](#)
- [*Phonics Skills: Spanish Decoding/Encoding Checklist \(KG\)*](#)

- [*Self-Monitoring: Spanish My Literacy Journey Tracker \(K-2\)*](#)

Table 1: Administration Guidance

Grade	Spanish Mastery Measure	Administration Recommendations
Kindergarten through Second Grade	Alphabetic Principles (Name the Letters & Say the Sounds)	<p>If a student has not yet mastered (less than 92%) letter names and/or sounds as evidenced by informal, formative data and/or summative data, determine the frequency of Mastery Measure probe administration.</p> <p>For those probes that assess on-grade-level skills, choose once every other week or once per week. For those probes that assess skills that were introduced in previous grade-levels, administer the probe more often—once to twice per week.</p> <p>An alternative: For those students that have not yet mastered the skill, use their performance/scores on other more formal assessments to determine frequency:</p> <ul style="list-style-type: none"> • Not Yet Mastered (<60%) = 2x per week • Not Yet Mastered (61%-80%) = 1x per week • Not Yet Mastered (81%-91%) = bi-weekly <p>Once the student demonstrates mastery on a probe, do not continue administering the remainder of the probes for that skill.</p> <p>Reminder: Update progress monitoring data using one or more of the following data tools:</p> <ul style="list-style-type: none"> • Spanish Phonics Skills Checklist (K-2)_(a). • Spanish Phonics Skills Checklist (K-2)_(b). • Alphabet Principle: Spanish Letter Recognition & Letter Sound Recognition Checklist (KG). • Phonics Skills: Spanish Decoding/Encoding Checklist (KG). • Phonics Skills: Spanish Decoding/Encoding Checklist (1G). • Phonics Skills: Spanish Decoding/Encoding Checklist (2G). • Self-Monitoring: Spanish My Literacy Journey Tracker (K-2).
	Decoding [VC & CVC, Digraphs, Beginning Blends, Ending Blends, Trilled R, Hard C/Soft G, Sílabas Trabadas, Multisyllabic Words]	

Alphabetic Principle: Letter Recognition (Name the Letters)

(Read the bolded sentences below exactly as written to ensure standardized administration.)

Say: Vas a decir el nombre de estas letras. Primero, nombrarás estas letras. (Run your finger across the first row of letters on the Spanish Diagnostic Assessment: Student Handout (Figure 2), showing the student which letters to read.) **Señalarás cada letra mientras dices su nombre. ¿Listo? Empezarás aquí** (point to the first letter in the row) **y continuarás leyendo.** (Once the student has finished with the first row, run your finger across the second row of letters, showing which letters to read.) **Ahora, dirás el nombre de estas letras. Empezarás aquí** (point to the first letter in the second row) **y continuarás leyendo. Recuerda señalar cada letra mientras dices su nombre.**

Prompting, Scoring & Data Collection Guidance:

- As the student names the letters, mark those they named correctly in the space below each letter on the Spanish Diagnostic Assessment (Phonics) Response Record (Figure 1). Record the student's incorrect response(s) on the blank(s) below the letter(s).
- If a student gives an incorrect answer but immediately self-corrects, it is correct.
- If a student gives the letter sound instead of the letter name, say "¿Cuál es el nombre de esta letra? (Point to the letter.)"
- If a student provides the same letter sound or a different incorrect answer, it is an error. Record the student's incorrect response, and continue the assessment. Do not give corrective feedback.
- If a student is "stuck" and doesn't respond, say "¿Cuál es el nombre de esta letra?" (Point to the letter.) If the student does not know, leave the space blank below the letter, and encourage the student to continue on to the next letter, giving an opportunity to read all letters in the subsection.
- If a student becomes frustrated, stop and mark the stopping point, noting any pertinent observations in the Observation(s) space on page 4.
- Use the Observation(s) space to keep record of any additional, important observations or notes regarding the student's performance on this section of the assessment.

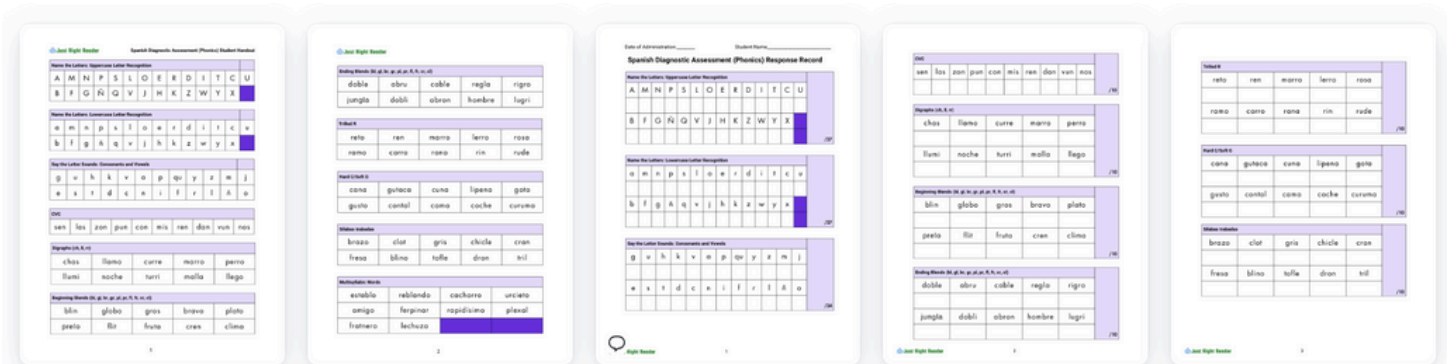

Alphabetic Principle: Letter Sound Recognition (Say the Sounds)

(Read the bolded sentences below exactly as written to ensure standardized administration.)

Say: Vas a decir el sonido de estas letras. Primero, dirás los sonidos que hacen estas letras. (Run your finger across the first row of letters, showing the student which letters to read on the Spanish Diagnostic Assessment: Student Handout (Figure 2). **Señalarás cada letra mientras dices su sonido. ¿Listo? Empezarás aquí** (point to the first letter in the row) **y continuarás leyendo.** (Once the student has finished with the first row, run your finger across the second row of letters, showing which letters to read.) **Ahora, dirás el sonido de estas letras. Empezarás aquí** (point to the first letter in the second row) **y continuarás leyendo. Recuerda señalar cada letra mientras dices su sonido.**

Prompting, Scoring & Data Collection Guidance:

- As the student says the sound, mark those they name correctly in the space below each letter on the Spanish Diagnostic Assessment (Phonics) Response Record (Figure 1). Record the student’s incorrect response(s) on the blank(s) below the letter(s).
- If a student gives an incorrect answer but immediately self-corrects, it is correct.
- If a student gives the letter name instead of the letter sound, say “¿Cuál es el sonido de esta letra?” (Point to the letter.)
- If a student provides the same letter name or a different incorrect answer, it is an error. Record the student’s incorrect response.
- If a student is “stuck” and doesn’t respond, say “¿Cuál es el sonido de esta letra?” (Point to the letter.) If the student does not know, leave the space blank below the letter. Instruct the student to look at the next letter(s), giving the opportunity to name all that they know.
- If a multilingual student confuses the vowel sounds and provides the answer in English or gives the soft sounds of c and g instead of the hard sounds, say “¿Cuál es el sonido de esta letra en español?” or “¿Cuál es el otro sonido que hace esta letra?”
- If a student provides the same or a different incorrect answer, it is an error. Record the student’s incorrect response, and continue the assessment. Do not give corrective feedback.
- If a student is “stuck” and does not know, leave the space blank below the letter, and encourage the student to continue on to the next letter, giving an opportunity to read all letters in the subsection.
- If a student becomes frustrated, stop and mark the stopping point, noting any pertinent observations in the Observation(s) space on page 4.
- Use the Observation(s) space to keep record of any additional, important observations or notes regarding the student’s performance on this section of the assessment.

Summative: Sets 1-2

Letter Recognition

Directions for Administration

Purpose of Assessment:

A summative assessment gauges students' knowledge and skills after teaching and learning have taken place. The intent of the assessment is to measure and report student mastery of the assessed standards/skills. (Teachers can also use this summative data to identify skills that need to be retaught, reinforced and/or to monitor student progress.)

Standards/Skills Assessed:

- **SLA. K.2.B.i:** Identify and match the common sounds that letters represent.
- **SLA.K.2.D.v:** Demonstrate print awareness by identifying uppercase and lowercase letters.

Teacher Directions

First, give each student the Student Response Handout for this set: Spanish Summative Assessment.

Say: Encuentra la imagen del _____. Piensa en el sonido con el que comienza la palabra. Escribe la letra minúscula para ese sonido en el primer espacio al lado de la imagen del _____. (Pause, giving students enough time to complete the first task.) **Ahora, escribe la letra mayúscula para ese mismo sonido al lado de la letra minúscula que escribiste.**

Repeat the directions above for each of the assessment items.

Assessment Items

Part A: Encoding

Letter Recognition

1. oso
2. masa
3. papa
4. ola
5. palo
6. nido
7. taza
8. rosa
9. luz
10. taxi

Scoring Guide

Each item is worth two points: one for writing the correct lowercase letter and one for writing the correct uppercase letter. (Total points possible = 10.)

Progress Monitoring

After each end-of-unit/set assessment:

- Update the *Spanish Phonics Skills Decoding/Encoding Checklist (KG)* and/or *Spanish Letter & Letter Sound Recognition Checklist (KG)*, noting any changes in student progress/mastery of skills.
- Support students as they update their *Spanish My Literacy Journey (Student Tracker)*.
- Based on student performance, consider whether or not to utilize targeted instruction and *Mastery Measures* and at what frequency to progress monitor using the skill-based probes. [See the *Spanish Just Right Reader Assessment Guide (Spanish Mastery Measures Administration Guide)*.]

Instrucciones para el estudiante: Encuentra la imagen. Piensa en el sonido con el que comienza la palabra. Escribe la letra minúscula para ese sonido en el primer espacio al lado del número 1. Ahora, escribe la letra mayúscula para ese mismo sonido al lado de la letra minúscula que escribiste.

1. _____

6. _____

2. _____

7. _____

3. _____

8. _____

4. _____

9. _____

5. _____

10. _____

Summative: Sets 3-5

Two Syllable Words:

a, m, n, p, s, l, o
e, r (hard), d, i, t

Introduce Closed

Syllables:
c (hard), u, b, f, g (soft)

Directions for Administration

Purpose of Assessment:

A summative assessment gauges students' knowledge and skills after teaching and learning have taken place. The intent of the assessment is to measure and report student mastery of the assessed standards/skills. (Teachers can also use this summative data to identify skills that need to be retaught, reinforced and/or to monitor student progress.)

Standards/Skills Assessed:

- **SLA.K.2.B.i:** Demonstrate and apply phonetic knowledge by identifying and matching the common sounds that letters represent.
- **SLA.K.2.B.ii:** Demonstrate and apply phonetic knowledge by using letter-sound relationships to decode one- and two-syllable words and multisyllabic words, including CV, VC, CCV, CVC, VCV, CVCV, CCVCV, and CVCCV.
- **SLA.K.2.C.i:** Demonstrate and apply spelling knowledge by spelling common letter and sound correlations.
- **SLA.K.2.C.ii:** Demonstrate and apply spelling knowledge by spelling words with common syllabic patterns such as CV, VC, CCV, CVC, VCV, CVCV, CCVCV, and CVCCV.

Teacher Directions

Part A

First, give each student a copy of *the Student Response Handout (Part A)*. (Alternatively, students may use lined paper for Part A.)

Say: Ahora diré una palabra dos veces. Primero vas a repetir la palabra después de mi y tocarás el espacio donde vas a escribir la palabra. Luego escribirás la palabra en el espacio correcto.

- **Encuentra el número uno. Aquí es donde escribirás tu primera palabra.**
- **La palabra es “___”.** (Repeat the word.) “_____” (Watch that students are pointing to and writing the word in the correct space.)
- **La siguiente palabra es “___”.** (Repeat the word.) “_____” (Watch that students are pointing to and writing the word in the correct space.)

Repeat the directions above for each of the assessment items.

Part B

Before beginning, laminate a copy of the Student Handout (Part B) to use with each administration.

You will need to administer Part B to each student individually. (Keep a copy of the Student Response Record (Part B) available to aid in scoring students' decoding.)

First, place the Student Handout (Part B) in front of the student for them to read.

Say: Vas a leer algunas palabras hoy. Las primeras palabras que leerás son palabras reales y el segundo grupo de palabras que leerás son palabras sin sentido o inventadas. Empezarás con las palabras reales. Encuentra la primera palabra real (point to the word on the student's handout) **y continúa leyendo hasta el final de la línea.** (After the student has finished reading the real words, continue with the nonsense words.) **Ahora, leerás las palabras sin sentido. Comienza con la primera palabra sin sentido y continúa leyendo hasta el final de la línea.** (Point to the starting word on the student's handout.)

Assessment Items

Part A: Encoding

Two Syllable Words / Closed Syllables

1. sapo
2. pala
3. lona
4. nido
5. come
6. pecas
7. pasa
8. gafas
9. final
10. foco

Part B: Decoding

Real Words	loca	dona	loma	dame	foca
Nonsense Words	cape	fafos	sata	nilos	mela

Scoring Guide

Each item in both the encoding and decoding sections is worth one point. Do not award partial credit for decoding or spelling part(s) of the item(s) correctly. (Each section is worth 10 points for a total of 20 points possible.) Use the *Student Response Record (Part B)* when scoring students' decoding.

Progress Monitoring

After each end-of-unit/set assessment:

- Update the *Spanish Phonics Decoding/Encoding Checklist (KG)*, noting any changes in student progress/mastery of skills.
- Support students as they update their *Spanish My Literacy Journey (Student Tracker)*.
- *Based on student performance, consider whether or not to utilize targeted instruction and Mastery Measures and at what frequency to progress monitor using the skill-based probes. [See the *Spanish Just Right Reader Assessment Guide (Spanish Mastery Measures Administration Guide)*.]*

Primero vas a repetir la palabra después de mí y tocarás el espacio donde vas a escribir la palabra. Luego escribirás la palabra en el espacio correcto.

Summative: Sets 6-10

Two and Three Syllable Words & Blends

Directions for Administration

Purpose of Assessment:

A summative assessment gauges students' knowledge and skills after teaching and learning have taken place. The intent of the assessment is to measure and report student mastery of the assessed standards/skills. (Teachers can also use this summative data to identify skills that need to be retaught, reinforced and/or to monitor student progress.)

Standards/Skills Assessed:

- **SLA.K.2.B:** Demonstrate and apply phonetic knowledge by identifying and matching the common sounds that letters represent.
- **SLA.K.2.B.ii:** Demonstrate and apply phonetic knowledge by using letter-sound relationships to decode one- and two-syllable words and multisyllabic words, including CV, VC, CCV, CVC, VCV, CVCV, CCVCV, and CVCCV.
- **SLA.K.2.B.iii:** Demonstrate and apply phonetic knowledge by decoding words with silent h and consonant digraphs.
- **SLA.K.2.B.iv:** Demonstrate and apply phonetic knowledge by recognizing that new words are created when syllables are changed, added, or deleted.
- **SLA.K.2.Ci:** Demonstrate and apply spelling knowledge by spelling common letter and sound correlations.
- **SLA.K.2.C.ii:** Demonstrate and apply spelling knowledge by spelling words with common syllabic patterns such as CV, VC, CCV, CVC, VCV, CVCV, CCVCV, and CVCCV.

Teacher Directions

Part A

First, give each student a copy of *the Student Response Handout (Part A)*. (Alternatively, students may use lined paper for Part A.)

Say: Ahora diré una palabra dos veces. Primero vas a repetir la palabra después de mi y tocarás el espacio donde vas a escribir la palabra. Luego escribirás la palabra en el espacio correcto.

- **Encuentra el número uno. Aquí es donde escribirás tu primera palabra.**
- **La palabra es “___”.** (Repeat the word.) “_____” (Watch that students are pointing to and writing the word in the correct space.)
- **La siguiente palabra es “___”.** (Repeat the word.) “_____” (Watch that students are pointing to and writing the word in the correct space.)

Repeat the directions above for each of the assessment items.

Part B

Before beginning, laminate a copy of the Student Handout (Part B) to use with each administration.

You will need to administer Part B to each student individually. (Keep a copy of the Student Response Record (Part B) available to aid in scoring students' decoding.)

First, place the Student Handout (Part B) in front of the student for them to read.

Say: Vas a leer algunas palabras hoy. Las primeras palabras que leerás son palabras reales y el segundo grupo de palabras que leerás son palabras sin sentido o inventadas. Empezarás con las palabras reales. Encuentra la primera palabra real (point to the word on the student's handout) **y continúa leyendo hasta el final de la línea.** (After the student has finished reading the real words, continue with the nonsense words.) **Ahora, leerás las palabras sin sentido. Comienza con la primera palabra sin sentido y continúa leyendo hasta el final de la línea.** (Point to the starting word on the student's handout.)

Assessment Items

Part A: Encoding

Two and Three Syllable Words & Blends

1. vida
2. verde
3. llamas
4. sellos
5. cabeza
6. bigote
7. nublada
8. roble
9. grupo
10. pobre

Part B: Decoding

Real Words	dique	bonita	leña	coche	regla
Nonsense Words	muso	guito	hera	yasu	zulo

Scoring Guide

Each item in both the encoding and decoding sections is worth one point. Do not award partial credit for decoding or spelling part(s) of the item(s) correctly. (Each section is worth 10 points for a total of 20 points possible.) Use the *Student Response Record (Part B)* when scoring students' decoding.

Progress Monitoring

After each end-of-unit/set assessment:

- Update the *Spanish Phonics Decoding/Encoding Checklist (KG)*, noting any changes in student progress/mastery of skills.
- Support students as they update their *Spanish My Literacy Journey (Student Tracker)*.
- *Based on student performance, consider whether or not to utilize targeted instruction and Mastery Measures and at what frequency to progress monitor using the skill-based probes. [See the Spanish Just Right Reader Assessment Guide (Spanish Mastery Measures Administration Guide).]*

Primero vas a repetir la palabra después de mi y tocarás el espacio donde vas a escribir la palabra. Luego escribirás la palabra en el espacio correcto.

1. _____

6. _____

2. _____

7. _____

3. _____

8. _____

4. _____

9. _____

5. _____

10. _____

Instrucciones para el estudiante: Ahora leerás algunas palabras a tu maestro(a). La primera fila de palabras son palabras reales y la segunda fila de palabras son palabras sin sentido o inventadas.

Fila 1	dique	bonita	leña	coche	regla
Fila 2	muso	guito	hera	yasu	zulo

Summative: Sets 11-13

Review: m, p,s, l, r (hard), d, n, t, c (hard), f, b, g (hard and soft)

Directions for Administration

Purpose of Assessment:

A summative assessment gauges students' knowledge and skills after teaching and learning have taken place. The intent of the assessment is to measure and report student mastery of the assessed standards/skills. (Teachers can also use this summative data to identify skills that need retaught, reinforced and/or to monitor student progress.)

Standards/Skills Assessed:

- **SLA.1.2.B.i:** Demonstrate and apply phonetic knowledge by identifying and matching sounds to individual letters.
- **SLA.1.2.B.ii:** Demonstrate and apply phonetic knowledge by decoding words with digraphs; and words with multiple sound spelling patterns such as c, k, and q and s, z, soft c, and x.
- **SLA.1.2.C.i:** Demonstrate and apply spelling knowledge by spelling common letter and sound correlations.
- **SLA.1.2.Cii:** Demonstrate and apply spelling knowledge by spelling words with common patterns such as CV, VC, CCV, CVC, VCV, CVCV, CCVCV, and CVCCV.

Repeat the directions above for each of the assessment items.

Part B

Before beginning, laminate a copy of the Student Handout (Part B) to use with each administration.

You will need to administer Part B to each student individually. (Keep a copy of the Student Response Record (Part B) available to aid in scoring students' decoding.)

First, place the Student Handout (Part B) in front of the student for them to read.

Say: Vas a leer algunas palabras hoy. Las primeras palabras que leerás son palabras reales y el segundo grupo de palabras que leerás son palabras sin sentido o inventadas. Empezarás con las palabras reales. Encuentra la primera palabra real (point to the word on the student's handout) **y continúa leyendo hasta el final de la línea.** (After the student has finished reading the real words, continue with the nonsense words.) **Ahora, leerás las palabras sin sentido. Comienza con la primera palabra sin sentido y continúa leyendo hasta el final de la línea.** (Point to the starting word on the student's handout.)

Assessment Items

Part A: Encoding

Words with ca, co, cu, ce, ci, que, qui

1. boca
2. cuna
3. quede
4. poco
5. aquí
6. cine
7. cereza
8. cobija
9. doce
10. cariño

Part B: Decoding

Real Words	casa	quema	busca	veces	cada
Nonsense Words	quili	puco	catema	erque	cecimo

Scoring Guide

Each item in both the encoding and decoding sections is worth one point. Do not award partial credit for decoding or spelling part(s) of the item(s) correctly. (Each section is worth 10 points for a total of 20 points possible.) Use the Student Response Record (Part B) when scoring students' decoding.

Progress Monitoring

After each end-of-unit/set assessment:

- Update the *Spanish Phonics Decoding/Encoding Checklist (First Grade)*, noting any changes in student progress/mastery of skills.
- Support students as they update their *Spanish My Literacy Journey (Student Goal Tracker)*.
- Based on student performance, consider whether or not to utilize targeted instruction and *Mastery Measures* and at what frequency to progress monitor using the skill-based probes. [See the *Spanish Just Right Reader Assessment Guide (Spanish Mastery Measures Administration Guide)*.]

Instrucciones para el estudiante: Tu maestro(a) te dirá una palabra para que la deletrees en los espacios de abajo. Tu maestro(a) repetirá la palabra. Escribe cada palabra en el espacio al lado del número. Escucha atentamente cada palabra.

Instrucciones para el estudiante: Ahora leerás algunas palabras a tu maestro(a). La primera fila de palabras son palabras reales y la segunda fila de palabras son palabras sin sentido o inventadas.

Fila 1	casa	quema	busca	veces	cada
Fila 2	quili	puco	catema	erque	cecimo

Summative: Sets 11-20

All Letters, Digraphs, Silent U, Diéresis, Contrasting Sounds

Directions for Administration

Purpose of Assessment:

A summative assessment gauges students' knowledge and skills after teaching and learning have taken place. The intent of the assessment is to measure and report student mastery of the assessed standards/skills. (Teachers can also use this summative data to identify skills that need retaught, reinforced and/or to monitor student progress.)

Standards/Skills Assessed:

- **SLA.1.2.B.i:** Demonstrate and apply phonetic knowledge by identifying and matching sounds to individual letters.
- **SLA.1.2.B.ii:** Demonstrate and apply phonetic knowledge by decoding words with digraphs; and words with multiple sound spelling patterns such as c, k, and q and s, z, soft c, and x.
- **SLA.1.2.B.iii:** Demonstrate and apply phonetic knowledge by decoding words with silent h and words that use the syllables que-, qui-, gue-, gui-, güe-, and güi-.
- **SLA.1.2.C.i:** Demonstrate and apply spelling knowledge by spelling common letter and sound correlations.
- **SLA.1.2.C.ii:** Demonstrate and apply spelling knowledge by spelling words with common patterns such as CV, VC, CCV, CVC, VCV, CVCV, CCVCV, and CVCCV.
- **SLA.1.2.C.iii:** Demonstrate and apply spelling knowledge by spelling words with silent h; consonant digraphs such as /ch/, /rr/, and /ll/.
- **SLA.1.2.C.iv:** Demonstrate and apply spelling knowledge by spelling multisyllabic words, including words with que-, qui-, gue-, gui-, güe-, and güi-.

Teacher Directions

Part A

First, give each student a copy of the Student Response Handout (Part A). (Alternatively, students may use lined paper for Part A.)

Say: Ahora diré una palabra dos veces. Primero vas a repetir la palabra después de mi y tocarás el espacio donde vas a escribir la palabra. Luego escribirás la palabra en el espacio correcto.

- **Encuentra el número uno. Aquí es donde escribirás tu primera palabra.**
- **La palabra es “___.”** (Repeat the word.) “_____” (Watch that students are pointing to and writing the word in the correct space.)
- **La siguiente palabra es “___.”** (Repeat the word.) “_____” (Watch that students are pointing to and writing the word in the correct space.)

Repeat the directions above for each of the assessment items.

Part B

Before beginning, laminate a copy of the Student Handout (Part B) to use with each administration.

You will need to administer Part B to each student individually. (Keep a copy of the Student Response Record (Part B) available to aid in scoring students' decoding.)

Purpose of Assessment:

A summative assessment gauges students' knowledge and skills after teaching and learning have taken place. The intent of the assessment is to measure and report student mastery of the assessed standards/skills. (Teachers can also use this summative data to identify skills that need retaught, reinforced and/or to monitor student progress.)

Standards/Skills Assessed:

- **SLA.1.2.B.ii:** Demonstrate and apply phonetic knowledge by decoding words with sílabas trabadas such as /bla/, /bra/, and /gla/.
- **SLA.1.2.B.iv:** Demonstrate and apply phonetic knowledge by decoding words with diphthongs such as /ai/, /au/, and /ei/.
- **SLA.1.2.B.vii:** Demonstrate and apply phonetic knowledge by using knowledge of base words to decode common compound words.
- **SLA.1.2.B.viii:** Demonstrate and apply phonetic knowledge by decoding words with common prefixes and suffixes.
- **SLA.1.2.Cii:** Demonstrate and apply spelling knowledge by spelling words with common patterns such as CV, VC, CCV, CVC, VCV, CVCV, CCVCV, and CVCCV.
- **SLA.1.2.C.iii:** Demonstrate and apply spelling knowledge by spelling words with sílabas trabadas such as /bla/, /bra/, /gla/, and /gra/.
- **SLA.1.2.C.vi:** Demonstrate and apply spelling knowledge by spelling words with diphthongs such as /ai/, /au/, and /ie/ as in quiero, na-die, and ra-dio.
- **SLA.1.2.C.vii:** Demonstrate and apply spelling knowledge by spelling words with common prefixes and suffixes.

Teacher Directions

Part A

First, give each student a copy of the Student Response Handout (Part A). (Alternatively, students may use lined paper for Part A.)

Say: Ahora diré una palabra dos veces. Primero vas a repetir la palabra después de mi y tocarás el espacio donde vas a escribir la palabra. Luego escribirás la palabra en el espacio correcto.

- **Encuentra el número uno. Aquí es donde escribirás tu primera palabra.**
- **La palabra es “___.”** (Repeat the word.) “_____” (Watch that students are pointing to and writing the word in the correct space.)
- **La siguiente palabra es “___.”** (Repeat the word.) “_____” (Watch that students are pointing to and writing the word in the correct space.)

Repeat the directions above for each of the assessment items.

Part B

Before beginning, laminate a copy of the Student Handout (Part B) to use with each administration.

You will need to administer Part B to each student individually. (Keep a copy of the Student Response Record (Part B) available to aid in scoring students' decoding.)

First, place the Student Handout (Part B) in front of the student for them to read.

Say: Vas a leer algunas palabras hoy. Las primeras palabras que leerás son palabras reales y el segundo grupo de palabras que leerás son palabras sin sentido o inventadas. Empezarás con las palabras reales. Encuentra la primera palabra real (point to the word on the student's handout) **y continúa leyendo hasta el final de la línea.** (After the student has finished reading the real words, continue with the nonsense words.) **Ahora, leerás las palabras sin sentido. Comienza con la primera palabra sin sentido y continúa leyendo hasta el final de la línea.** (Point to the starting word on the student's handout.)

Assessment Items

Part A: Encoding

Blends, Prefixes & Suffixes, Diphthongs, Compound Words, & Graphic Accents Contrasts

1. planeta
2. hablar
3. globo
4. atleta
5. fruta
6. abrazo
7. apretar
8. cristal
9. desanimado
10. autor

Part B: Decoding

Real Words	sabrosa	traigo	salvavidas	grito	traspié
Nonsense Words	ferrino	nortaba	destornar	sunato	glutema

Scoring Guide

Each item in both the encoding and decoding sections is worth one point. Do not award partial credit for decoding or spelling part(s) of the item(s) correctly. (Each section is worth 10 points for a total of 20 points possible.) Use the Student Response Record (Part B) when scoring students' decoding.

Progress Monitoring

After each end-of-unit/set assessment:

- Update the *Spanish Phonics Decoding/Encoding Checklist (First Grade)*, noting any changes in student progress/mastery of skills.
- Support students as they update their *Spanish My Literacy Journey (Student Goal Tracker)*.
- Based on student performance, consider whether or not to utilize targeted instruction and *Mastery Measures* and at what frequency to progress monitor using the skill-based probes. [See the *Spanish Just Right Reader Assessment Guide (Spanish Mastery Measures Administration Guide)*.]

Instrucciones para el estudiante: Tu maestro(a) te dirá una palabra para que la deleetrees en los espacios de abajo. Tu maestro(a) repetirá la palabra. Escribe cada palabra en el espacio al lado del número. Escucha atentamente cada palabra.

Nonsense Words	payna	nareyno	pueyla	biauto	tuayco

Scoring Guide

Each item in both the encoding and decoding sections is worth one point. Do not award partial credit for decoding or spelling part(s) of the item(s) correctly. (Each section is worth 10 points for a total of 20 points possible.) Use the Student Response Record (Part B) when scoring students' decoding.

Progress Monitoring

After each end-of-unit/set assessment:

- Update the *Phonics: Spanish Decoding/Encoding Checklist (Second Grade)*, noting any changes in student progress/mastery of skills.
- Support students as they update their *My Literacy Journey (Student Tracker)*.
- Based on student performance, consider whether or not to utilize targeted instruction and *Mastery Measures* and at what frequency to progress monitor using the skill-based probes. [See the *Spanish Just Right Reader Assessment Guide (Spanish Mastery Measures Administration Guide)*.]

Instrucciones para el estudiante: Tu maestro(a) te dirá una palabra para que la deleetrees en los espacios de abajo. Tu maestro(a) repetirá la palabra. Escribe cada palabra en el espacio al lado del número. Escucha atentamente cada palabra.

Summative: Set 40

Hiatus

Directions for Administration

Purpose of Assessment:

A summative assessment gauges students' knowledge and skills after teaching and learning have taken place. The intent of the assessment is to measure and report student mastery of the assessed standards/skills. (Teachers can also use this summative data to identify skills that need to be retaught, reinforced and/or to monitor student progress.)

Standards/Skills Assessed:

- **SLA.2.2.A.i:** Demonstrate and apply phonetic knowledge by decoding multisyllabic words.
- **SLA.2.2.A.iv:** Demonstrate and apply phonetic knowledge by decoding words with diphthongs and hiatus.
- **SLA.2.2.B.i:** Demonstrate and apply spelling knowledge by spelling multisyllabic words.
- **SLA.2.2.B.ii:** Demonstrate and apply spelling knowledge by spelling words with diphthongs and hiatus.

Teacher Directions

Part A

First, give each student a copy of the Student Response Handout (Part A). (Alternatively, students may use lined paper for Part A.)

Say: Ahora diré una palabra dos veces. Primero vas a repetir la palabra después de mi y tocarás el espacio donde vas a escribir la palabra. Luego escribirás la palabra en el espacio correcto.

- **Encuentra el número uno. Aquí es donde escribirás tu primera palabra.**
- **La palabra es “___.”** (Repeat the word.) “_____” (Watch that students are pointing to and writing the word in the correct space.)
- **La siguiente palabra es “___.”** (Repeat the word.) “_____” (Watch that students are pointing to and writing the word in the correct space.)

Repeat the directions above for each of the assessment items.

Part B

Before beginning, laminate a copy of the Student Handout (Part B) to use with each administration.

You will need to administer Part B to each student individually. (Keep a copy of the Student Response Record (Part B) available to aid in scoring students' decoding.)

First, place the Student Handout (Part B) in front of the student for them to read.

Say: Vas a leer algunas palabras hoy. Las primeras palabras que leerás son palabras reales y el segundo grupo de palabras que leerás son palabras sin sentido o inventadas. Empezarás con las palabras reales. Encuentra la primera palabra real (point to the word on the student's handout) **y continúa leyendo hasta el final de la línea.** (After the student has finished reading the real words, continue with the nonsense words.) **Ahora, leerás las palabras sin sentido. Comienza con la primera palabra sin sentido y continúa leyendo hasta el final de la línea.** (Point to the starting word on the student's handout.)

Assessment Items

Summative: Set 45

Graphic Accents Contrasts

Directions for Administration

Purpose of Assessment:

A summative assessment gauges students' knowledge and skills after teaching and learning have taken place. The intent of the assessment is to measure and report student mastery of the assessed standards/skills. (Teachers can also use this summative data to identify skills that need to be retaught, reinforced and/or to monitor student progress.)

Standards/Skills Assessed:

- **SLA.2.2.A.i:** Demonstrate and apply phonetic knowledge by decoding multisyllabic words.
- **SLA.2.2.B.i:** Demonstrate and apply spelling knowledge by spelling multisyllabic words.

Teacher Directions

Part A

First, give each student a copy of the Student Response Handout (Part A). (Alternatively, students may use lined paper for Part A.)

Say: Ahora diré una palabra dos veces. Primero vas a repetir la palabra después de mi y tocarás el espacio donde vas a escribir la palabra. Luego escribirás la palabra en el espacio correcto.

- **Encuentra el número uno. Aquí es donde escribirás tu primera palabra.**
- **La palabra es “___.”** (Repeat the word.) “_____” (Watch that students are pointing to and writing the word in the correct space.)
- **La siguiente palabra es “___.”** (Repeat the word.) “_____” (Watch that students are pointing to and writing the word in the correct space.)

Repeat the directions above for each of the assessment items.

Part B

Before beginning, laminate a copy of the Student Handout (Part B) to use with each administration.

You will need to administer Part B to each student individually. (Keep a copy of the Student Response Record (Part B) available to aid in scoring students' decoding.)

First, place the Student Handout (Part B) in front of the student for them to read.

Say: Vas a leer algunas palabras hoy. Las primeras palabras que leerás son palabras reales y el segundo grupo de palabras que leerás son palabras sin sentido o inventadas. Empezarás con las palabras reales. Encuentra la primera palabra real (point to the word on the student's handout) **y continúa leyendo hasta el final de la línea.** (After the student has finished reading the real words, continue with the nonsense words.) **Ahora, leerás las palabras sin sentido. Comienza con la primera palabra sin sentido y continúa leyendo hasta el final de la línea.** (Point to the starting word on the student's handout.)

Part B: Decoding

Real Words	camino	clavó	está	limpio	gritó
Nonsense Words	durdó	nupié	sulabe	tralocá	biru

Scoring Guide

Each item in both the encoding and decoding sections is worth one point. Do not award partial credit for decoding or spelling part(s) of the item(s) correctly. (Each section is worth 10 points for a total of 20 points possible.) Use the Student Response Record (Part B) when scoring students' decoding.

Progress Monitoring

After each end-of-unit/set assessment:

- Update the *Phonics: Spanish Decoding/Encoding Checklist (Second Grade)*, noting any changes in student progress/mastery of skills.
- Support students as they update their *My Literacy Journey (Student Tracker)*.
- Based on student performance, consider whether or not to utilize targeted instruction and *Mastery Measures* and at what frequency to progress monitor using the skill-based probes. [See the *Spanish Just Right Reader Assessment Guide (Spanish Mastery Measures Administration Guide)*.]

Instrucciones para el estudiante: Tu maestro(a) te dirá una palabra para que la deleetrees en los espacios de abajo. Tu maestro(a) repetirá la palabra. Escribe cada palabra en el espacio al lado del número. Escucha atentamente cada palabra.

Instrucciones para el estudiante: Ahora leerás algunas palabras a tu maestro(a). La primera fila de palabras son palabras reales y la segunda fila de palabras son palabras sin sentido o inventadas.

Fila 1	camino	clavó	está	limpio	gritó
Fila 2	durdó	nupié	sulabe	tralocá	biru

Summative: Set 46

Prefixes des-, i-, in-, im-

Directions for Administration

Purpose of Assessment:

A summative assessment gauges students' knowledge and skills after teaching and learning have taken place. The intent of the assessment is to measure and report student mastery of the assessed standards/skills. (Teachers can also use this summative data to identify skills that need to be retaught, reinforced and/or to monitor student progress.)

Standards/Skills Assessed:

- **SLA.2.2.A.i:** Demonstrate and apply phonetic knowledge by decoding multisyllabic words.
- **SLA.2.2.A.vii:** Demonstrate and apply phonetic knowledge by decoding words with prefixes and suffixes.
- **SLA.2.2.B.i:** Demonstrate and apply spelling knowledge by spelling multisyllabic words.
- **SLA.2.2.B.iv :** Demonstrate and apply spelling knowledge by spelling words with prefixes and suffixes.

Teacher Directions

Part A

First, give each student a copy of the Student Response Handout (Part A). (Alternatively, students may use lined paper for Part A.)

Say: Ahora diré una palabra dos veces. Primero vas a repetir la palabra después de mi y tocarás el espacio donde vas a escribir la palabra. Luego escribirás la palabra en el espacio correcto.

- **Encuentra el número uno. Aquí es donde escribirás tu primera palabra.**
- **La palabra es “___.”** (Repeat the word.) “_____” (Watch that students are pointing to and writing the word in the correct space.)
- **La siguiente palabra es “___.”** (Repeat the word.) “_____” (Watch that students are pointing to and writing the word in the correct space.)

Repeat the directions above for each of the assessment items.

Part B

Before beginning, laminate a copy of the Student Handout (Part B) to use with each administration.

You will need to administer Part B to each student individually. (Keep a copy of the Student Response Record (Part B) available to aid in scoring students' decoding.)

First, place the Student Handout (Part B) in front of the student for them to read.

Say: Vas a leer algunas palabras hoy. Las primeras palabras que leerás son palabras reales y el segundo grupo de palabras que leerás son palabras sin sentido o inventadas. Empezarás con las palabras reales. Encuentra la primera palabra real (point to the word on the student's handout) **y continúa leyendo hasta el final de la línea.** (After the student has finished reading the real words, continue with the nonsense words.) **Ahora, leerás las palabras sin sentido. Comienza con la primera palabra sin sentido y continúa leyendo hasta el final de la línea.** (Point to the starting word on the student's handout.)

Assessment Items

Part A: Encoding

Prefixes des-, i-, in-, im-

1. desplegar
2. irreal
3. descansando
4. inolvidable
5. imberbe
6. desilusionar
7. inagotable
8. impar
9. desocupado
10. imparcial

Part B: Decoding

Real Words	impaciencia	incorrecto	desorden	inactivo	desconectar
Nonsense Words	desverar	imlaro	infebros	desupa	intreco

Scoring Guide

Each item in both the encoding and decoding sections is worth one point. Do not award partial credit for decoding or spelling part(s) of the item(s) correctly. (Each section is worth 10 points for a total of 20 points possible.) Use the Student Response Record (Part B) when scoring students' decoding.

Progress Monitoring
